

HOSPITALITY INTERIORS

JACKSON TEECE

Social interaction - it's the key factor at play when designing for Hospitality environments. The spaces within which we engage with friends, family and strangers need to provide comfort, enlivenment, intimacy at times, and always feel appropriate. When in a well-designed space there's a subconscious lift in spirits - we feel happier, we take more risks, we relax, we spend money.

For more information on any of the projects in this document, or to discuss a business opportunity, please contact Paul Brace (Interiors Director)
